BATTERY REGENERATION

- ❖ Designed for industrial batteries, is remarkable for its compactness and its innovative, particularly effective technology
- ❖ Desulfates batteries using an effective and gentle high frequency process with intelligent logic
- ❖ can resolve cell defects such as micro-short circuits arising from corrosion, dirt and dendrite build-up
- ❖ requires just six to twelve hours for regenerating batteries depending on the battery's capacity and status
- ❖ can be used efficiently to regenerate batteries on site
